**The enrollment-based
pre-payment program from
Peachtree Hills Animal Hospital.**

You asked, we listened.

In response to many of our clients' request for a monthly billing format, Peachtree Hills Animal Hospital created an enrollment-based prepayment program. Introducing **proACT**.

Give your pet the best care possible.

While veterinary care is a bargain relative to human care, emergencies can catch you off guard financially. Even well visits can be postponed due to budgeting constraints. With **proACT** you get financial ease by getting ahead of the costs associated with your pet's care.

The proactive **proACT** program operates like a credit on your savings account, enabling you to be prepared for any level of care your pet may need.

How it works.

Clients subscribe, paying a small enrollment fee. Enrolled clients prepay nominal installments by automatic debit or credit card, such as \$50 monthly and a \$2.75 processing fee, for a total installment cost of \$52.75 per month. In this example, the client's account is credited \$50 and the money may be used for any product or service at Peachtree Hills Animal Hospital, including food and prescription medicine as well as medical supplies.

At the end of your pet's life or if you move, you will be refunded a check for your current balance, minus a \$10 processing fee. Or, you may opt to roll your balance into another pet account. You may enter or exit the proACT program whenever you choose. There is a nominal processing fee to get started.

Frequently Asked Questions:

Is proACT a Wellness Plan?

Not exactly. Other hospital wellness plans are set up as a discounted package of services, with large enrollment and exit fees. Realistically, most clients do not use all the covered services, and many necessities are not covered. In general, pet owners like this type of plan if their pet is healthy, but that often changes when they get sick. With **proACT** you can use your funds for **ANY** service or product. We like to think of **proACT** as a "work toward the best, plan for the worst" approach to your pet's health.

Is it Pet Insurance?

No. Pet Insurance is a **reactive** plan for catastrophic illness which doesn't fully cover well or preventative visits, while **proACT** is a comprehensive annual pre-paid account that covers well check-ups and other routine services and preventative care. **Funds accrued in the account may be used for any service, at any time.**

And since there is no duplication between programs, it is important to note that pet owners with pet insurance may also participate in **proACT**.

Optimizing preventative care by removing barriers.

You love your animal and we love your animal. We all want what's best. The goal of **proACT** is to allow the practitioners at Peachtree Hills Animal Hospital to practice preventative medicine and to help diagnose potential problems early and optimize your pet's lifespan.
